Attachments

T3005

## T3005 Bypass Log Grapple

An original mini-grapple by Branch Manager Attachments built from the ground up in our signature style.

Our BMG 3000 series utilizes forestry duty features in a lightweight package to provide a robust, hassle free grapple that maximizes your machine's capabilities.

High precision pins & bushings with protected grease ports, internal transfer arms, and Hardox® wear plate help to support a long service life grapple.

The Rotary Union of the T3005 model allows infinite rotation of the grapple while completely protecting the hoses and maintaining the familiar return to center of the BMG.
